PORPLASTIC *TENNIS*

SUPERIOR RANGE OF CLAY AND SYNTHETIC TENNIS COURT SYSTEMS
INDOOR AND OUTDOOR COURT SURFACES

VIACOR VISION

A DYNAMIC ORGANISATION WHICH
LIVES FOR SPORT

VIACOR inventive polymers —

The complete range of classical industrial floor coatings ranges from parking deck systems and decorative flooring through to sports flooring coatings for running tracks, multi-use games areas and tennis courts as well as shock-absorbing surfaces for playgrounds, and these manufactured in Germany and also Malaysia to service the Asian market.

We have over 50 years' experience of sports flooring for indoor and outdoor areas and have installed over 30 million m² PORPLASTIC sports' surfaces, with the most diverse projects extending from Hong Kong to Trinidad to Stuttgart, the capital city of Baden-Wuerttemberg.

The ITF certified tennis courts used for the Porsche Tennis Grand Prix and the IAAF certified running track in Split, are only 2 of many examples where our products are being used.

for Winners

- Worldwide references
- ITF certified systems
- Tennis systems for all requirements

GAME SET & MATCH

HIGH PERFORMANCE TENNIS COURT
ADVANTAGE: FULLY CUSHIONED

Courts that fits all styles of play.

The Porplastic synthetic range of cushioned- and hard courts responds to all styles of play and makes all players enjoy the true game of tennis.

The ball bounce on this range is tested in Cat. 3 for the ITF, meaning medium Slow. With this ball speed we can expect longer rallies for a better practice to improve your game.

The constant shock absorption reduces injury risk for both recreational and professional players that spend hours of practice.

Porplastic Tennis Comfort is tested and controlled to give the best shock absorption to prevent stress injuries.

Our tennis court systems are easy to install.

TENNIS & EVEN MORE

OUR PASSION

GOOD ISN'T GOOD ENOUGH!

The perfect tennis court like grass and clay!

We have been developing tennis systems to satisfy all requirements for many years. Our synthetic grass and coating systems offer a cost-effective solution for schools and sports' clubs alike, due to the low level of maintenance and the fact that every sport can be played on them.

The perfect tennis court, with the speed and ball reaction of a clay court, and a low level of maintenance.

Interesting Facts:

What does the ITF certification mean?

The ITF court classification programme was developed to support the procurement process of tennis surfaces. The type and speed of the surface which will best suit its specific requirements is determined. The ITF classifies the surfaces in 1 of 5 categories according to its Court Pace rating:

A surface product, which is available on the ITF classified surface list, is solely listed on the basis of its Court Pace rating. ITF classification doesn't in anyway represent any ITF approval or endorsement.

There are 5 different classifications: SLOW, MEDIUM-SLOW, MEDIUM, MEDIUM-FAST, FAST

Classification 1 is for
PORPLASTIC *RedClay pro*

Classification 3 is for
PORPLASTIC *TENNIS comfort*
