# VIASOL SYSTEMS

## Heavenly floors with style and comfort – like walking on clouds

VIASOLELASTIC SKY is the innovative, self-leveling coating with the refreshingly novel color and structural particles, which are contained in the ready to use liquid compound and impart an incomparable charisma to the coating. With the particles absolutely uniformly distributed in the special translucent formulation an attractive broadcast effect as well as a 3-D effect is created. You just might feel like walking on clouds – and that with a single layer of coating. Gone are the times when applying decorative floor coatings meant painstakingly broadcasting flakes or glimmer – just to end up with too much, too little or unevenly distributed flakes, especially close to walls and in connection areas. VIASOLELASTIC SKY guarantees a foolproof and easy application with reliable results.

VIACOR'S Development Group have made sure that, despite the outstanding attractiveness, the excellent technical properties of the VIASOLELASTIC comfort system remain unchanged.

### SYSTEM BENEFITS

- self-levelling, seamless
- impact sound reducing
- easy on the joints, permanently elastic
- very hard wearing (suitable for office swivel chairs)
- good chemical resistance and excellent abrasion resistance
- smooth to slip-resistant surfaces
- hygienic, pore free and impervious to fluids
- easy to clean
- resistant to rising damp
- available in a wide range of colours
- low emissions according of VOC (complies with German AgBB standard)
- permanent UV resistance
- reliable application for perfect aesthetics in one layer

### SECTORS

Shops  
Foyers  
Clinics  
Offices  
Schools  
Retirement homes  
Showrooms

## VIASOLELASTIC SKY

<b>Sealer/Top coat</b>	transparent UV resistant, colour stable, abrasion resistant	PU-based
<b>Design coat</b>	coloured, self-levelling, elastic with 3-D effect	PU-based
<b>Base layer (recommended)</b>	elastic	PU-based
<b>Primer</b>		EP- or PU-based
<b>Substrate/Concrete</b>		

misty grey

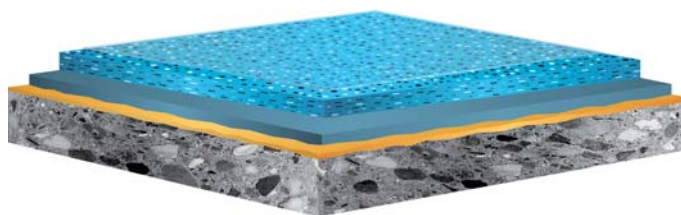

## VIASOLELASTIC SKY *comfort* VIASOLELASTIC SKY *soft*

<b>Sealer/Top coat</b>	transparent UV resistant, colour stable, abrasion resistant	PU-based
<b>Design coat</b>	coloured, self-levelling, elastic with 3-D effect	PU-based
<b>Base layer (recommended)</b>	elastic	PU-based
<b>Pore sealer</b>	only on elastic mats	PU-based
<b>Elastic mat (comfort)</b>	bonded with adhesive	PU-based
<b>or Elastic layer (soft)</b>	highly elastic	PU-based
<b>Primer</b>		EP- or PU-based
<b>Substrate/Concrete</b>		

midnight blue

The polyurethane coating system with 3-D effect, a unique combination of radiance and brilliance with all the advantages of a seamless comfort floor coating.

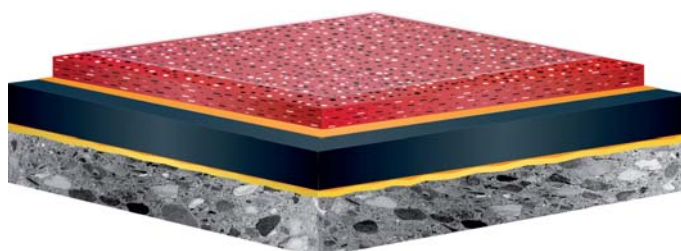

System thickness approx. 3 – 5 mm

The polyurethane coating system with 3-D effect, the highest walking comfort and footfall sound absorption together with the unique combination of radiance and colour.

System thickness comfort: approx. 6 – 13 mm (4 – 9 mm mat, 2 – 4 mm coating)

System thickness soft: approx. 5 – 8 mm

Variations in structure and layer thicknesses possible

## Layer by layer your individual floor

**VIACOR*Portfolio*** – the tailor-made product for every application

**VIASOLSYSTEMS** – flooring systems for industrial and public floors

## VIASOL**DECK** – state-of-the-art car park flooring systems

## VIASEAL **SPRAY COATS** – advanced waterproofing

**VIASAN BUILDING PROTECTION** – for high-quality concrete repair

**PORPLASTIC*SPORTS FLOORS*** – for outdoor and indoor use, for sports and leisure

VIACOR*Perspective* – green and sustainable

the aim of keeping our planet a good place to live for the future reigns our company

- use of polyurethane as a natural renewable raw material from the castor oil plant
- fillers and pigments from natural sources e.g. quartz sands
- concentration on water-based and solvent free products
- a sustainable investment: VIASOL floors are long-lasting and can be easily revitalized for an even longer lifetime
- we control the processes of purchase, production, the products themselves and their application to be environmentally friendly
